HELPFUL HINTS

Change your smoke detector battery each year.

Replace your hot water tank BEFORE it breaks. It always seems to break when you are away. Write the purchase date on your tank. They generally have a five-year lifetime.

Pour bleach down the Air Conditioner drip line. This is the line that drains excess condensation water. If the line is clogged you will have water damage. It happens frequently, so keep up with this maintenance. This is an owner responsibility.

Have your AC and furnace checked regularly. Furnaces can develop dangerous cracks. ACs need Freon.

Make sure your attic vent fan is working. They wear out every few years. This fan vents the hot air and moisture out of the attic. A properly working fan will greatly reduce your electric bill. Excess attic moisture can be damaging to roofs, siding, and ceilings.

Washing machine water supply lines can break, and what a mess! Rubber or vinyl hoses can break in just a few years. Braided stainless steel hoses provide superior bursting strength. This is an easy do it yourself project.

DeKalb Police recommend you have a noise maker (alarm or barking dog). If you see anything suspicious, call 911.

In the winter make sure your pipes don't freeze. This is your responsibility. Let your faucets drip in extremely cold weather. Always keep heat in your house (this is required by the By-Laws).

Report any and all annoying airplane noise. The PDK Noise Hotline phone number is listed in this directory along with other important numbers inside the cover.

Have your chimney checked and cleaned if you burn wood.
